# Can I attach my vcard in my email signature?

Yes, you can include a QR code linking to your vcard in your email signature. Follow these steps to do so:

1. Choose your vcard and download its QR code in PNG format:

2. Add the QR code to your signature: Open the signature settings of your email client and insert the QR code image into your signature. Ensure the design is clean and professional.

?? By adding a QR code to your email signature, you provide your contacts with the option to scan it with their mobile devices to quickly add your information to their contacts. This enhances the accessibility and professionalism of your communications.
